Scientific Method Project Definition Worksheet

Name:

Team Project? Yes / No Additional Team Members 1)
2)

My Question Is: (A scientific question usually starts with: How, What, When, Why, or Where. It should involve factors or traits that you can easily measure.)

When I researched my question/topic I found: (Investigate keywords about your question, or discuss what you read/saw that lead you to your question.)

My Hypothesis is: (A hypothesis is an educated guess about how something works. Be sure you can measure "what you do" and "what will happen.") Example: If [I do this], then [this] will happen.

Experimental Procedure: (This is a detailed explanation of what you plan to do for your experiment. The final version should be detailed enough that someone else can exactly duplicate your experiment.)
